

# ZIPGROW™

## EDUCATION RACK

HYDROPONIC GARDEN  
FOR SCHOOLS, RESEARCH, AND SMALL BUSINESS

The ZipGrow FarmWall education rack has been designed to allow teachers and students to grow leafy greens and herbs hydroponically inside their classroom.

- **Provides a wide range of learning opportunities including:**

Agriculture

Math

Economics

Engineering

Science

Health and Wellness

- Quick assembly. Available in single or double sided. Complete with LED grow lights, ZipGrow Towers.
- Specifically engineered to fit inside a standard classroom door frame. Wheeled for easy maneuverability.
- No soil, no mess and uses up to 90% less water than traditional agriculture.

"The beauty of system like this is it provides really diverse ways for students to engage with learning from it."

- Greg Farish, Coordinator St. Michaels University School
