

ZIPGROW™ TOWER

THE CORE OF ZIPGROW'S
HYDROPONIC SYSTEMS

ZipGrow™ Towers are used in home growing and commercial hydroponic and aquaponic systems all around the world. By growing vertically with ZipGrow™ Towers you can double or even triple production over other hydroponic methods.

The Tower™ is a housing with folded Matrix Media™ inside and a wicking strip sandwiched between the media that wicks water to the seedling plug.

Productive

Towers are specially designed for high-density hydroponic farming. Matrix Media™ secures plant roots, minimizing temperature fluctuations in the root zone, which increases growth rates.

Efficient

Modular growing Towers are light and easy to move, rearrange, harvest, or transport making the entire growing process simple. Designed for maximum light and space use efficiency.

Reliable

ZipGrow™ Towers are designed to last a lifetime; we're so sure of their quality that the Tower™ housing is guaranteed for 20 years.

**WHEN YOU GROW UP,
THE SKY'S THE LIMIT!**
