

ZIPPOD™

ZIPGROW™

PURPOSE BUILT - TURNKEY
HYDROPONIC CONTAINER FARM

Think outside the box and grow in it.

The ZipGrow™ ZipPod is the next generation of container farming technology. Rated at R22, ZipPod can operate in areas +/- 45C (-50F to 115F).

Turnkey Solution

Bring fresh healthy food to communities where and when you need it. From the desert to the arctic, urban to remote, the ZipPod is a full turnkey farm, allowing you to grow leafy greens, herbs and fruiting crops in a controlled indoor environment within a small footprint.

Purpose Built

Larger than other container farms on the market, the 10' x 10' x 40' farm allows for increased air circulation, workability and quality crop yields. It boasts extremely advanced equipment including speciality HVAC and plumbing. Engineered in house using ZipGrow's patented Tower™ systems that maximize production.

Full Support

To ensure you have all the knowledge needed to become a Master Grower ZipGrow offers on-site training and remote support. Educate yourself on everything hydroponic related through our online Upstart University courses.
