

ARE YOU ZIPGROW MATERIAL?

ASSISTANT GROWER

ZipGrow designs and builds the most installed vertical farming technology in the world. We educate, equip, and empower local farmers to grow better food for their communities and operate successful vertical farms with ZipGrow Technology.

We believe empowering these farmers helps create access to better food for all people through a distributed network of values-based, economically viable farms.

We offer a variety of products and services that stack the deck for small farmers wanting to grow more food with fewer resources using appropriate growing techniques and technology.

Our flagship product, the ZipGrow Tower, is a core component of many of the systems used by today's most innovative farmers, from indoor hydroponic warehouse farms to vertical aquaponic greenhouses, and even a variety of high-density container farms.

The bottom line: Our team has the drive and experience necessary to help modern farmers succeed.

WHAT WE ARE LOOKING FOR

ZipGrow is looking to add a motivated individual to our growing team to assist with day-to-day operations of our research farm in Cornwall, Ontario. An ideal candidate has experience in Horticulture, Agriculture, Greenhouses, Environmental Science, or Food Production and is looking to apply previous skills to a new industry. The individual will be required to complete physical tasks such as lifting fertilizer bags that exceed 25kg, working in greenhouse environments, and working with hydroponic equipment. YouTube/Social Media experience and an ability to record instructional videos is a definite asset.

TASKS

- Mixing fertilizer and maintaining hydroponic equipment
- Harvesting, weighing, and collecting relevant data on a wide variety of vertically grown crops
- Applying biological pest control products and scouting crops for pests
- Writing and implementing Standard Operating Procedures, safety materials, and video content for online learning platforms

Freedom and autonomy go hand in hand at ZipGrow. We have taken on the challenge to fundamentally shift the way we grow food because we want to make a difference. We're leaving a mark on the world and we are proud of the impact we are making.
