

# CAPACITY AND DOSING GUIDE

UNIT SIZE	WATER CAPACITY LITERS (GAL)	CANNA AQUA VEGA (2ML/L)	OR	CANNA START (4ML/L)	CLEANGROW5 (CLEANGROW20) 20PPM	CLEANGROW5 (CLEANGROW20) SHOCK-100PPM
2 TOWER FARMWALL	6.43 (1.7)	13 ML		26 ML	2.6ML (0.6ML)	13ML (3.2ML)
4 TOWER FARMWALL	11.43 (3.02)	23 ML		46 ML	4.6ML (1.1ML)	23ML (5.7ML)
8 TOWER FARMWALL	21.8 (5.75)	44 ML		87 ML	8.7ML (2.2ML)	44ML (21.8ML)
EDUCATION RACK SINGLE SIDE	21.8 (5.75)	44 ML		87 ML	8.7ML (2.2ML)	44ML (21.8ML)

## PH BUFFERS

ADJUSTING PH	PH RAISE + (17%)	PH LOWER – (34%)
COMMERCIAL MAIN RESERVOIRS	~5ML FOR EVERY .1 RAISE	~5ML FOR EVERY .1 DOWN

NOTE: These pH dosage amounts are meant to be used as a reference. There are many factors of water quality that can impact the effectiveness of the adjustors. In some cases, it might require more or less to be added. When adding pH raise or lower, always add small amounts and give the water time to mix between adjustments. 10 to 30 minutes is ideal between each adjustment before taking another reading.
